ROBOT FEEDING SYSTEM

ARVO-TEC FEEDING ROBOT

Arvo-Tec feeding robot improves feeding efficiency and saves labour time by feeding a large number of tanks with a single robot thus eliminating the need for a feeder at each tank.

Arvo-Tec BASE unit controls up to 3 robots with a combined total of 240 tanks and maximum rail length of 450 metres per robot.

High feed turnover rate through the hopper keeps feed fresh and central location of silos makes storing the feed simple.

Flexible programming using magnets as reference points. Set 1, 2 or 3 feeding points for each tank or feed whilst on the move.

One robot can handle multiple feeding frequencies at once for different types and sizes from fry to broodstock.

Standard versions for 2-4 feed and 50l hoppers. Custom sizes and configurations are available on request up to a total feed weight of 300kg or 450 litres.

Options for full Arvo-Tec control system with PC connection or standalone robot.

Arvo-Tec LD & HD electric spreaders can be mounted on the robot with ease.

Pellet size up to 8mm \varnothing

Our specialists are ready to help you with rail configuration as well as robot design. Please contact your nearest retailer for further info.

TECHNICAL SPECIFICATIONS

- TRAVEL SPEED 18M/MIN (6MIN/100M)
- MAX. DAILY DOSE >2000KG
- BATTERY POWERED 24 VDC – RECHARGES AT HOME BASE/CHARGING STATION
- OPTICAL SENSOR FOR COLLISION AVOIDANCE
- STANDARD OPTIONS FOR 2-4 FEEDS
- MAX RAIL LENGTH 450 M / ROBOT, MAX 240 TANKS /ROBOT
- AUTOMATIC REFILLING SYSTEM OPTIONAL
- ADVANCED ARVO-TEC CONTROL SYSTEM WITH PC CONNECTION OPTIONAL
- COMPATIBLE WITH ELECTRICAL DISC SPREADERS
- FLEXIBLE RAIL CONFIGURATIONS AND FEEDING BEHAVIOUR OPTIONS
- INP 80 DIN 1025 RAIL

ARVO-TEC WEB BASED FEEDING SOFTWARE & PC USER INTERFACE

Adding a PC connection with web based software to Arvo-Tec feeding system gives access to clear, easy to use graphic interface with optimized functions for managing your farm with ease. Control PC works as a central user interface to the system enabling control of all WOLF-control units, probes, feeders and other connected equipment from one point. Quick overview of you measurements, alarms and detailed tank status. Create day reports, feed reports and store all your data. Information can be exported to be used by 3rd party software e.g. Excel, Fishtalk.

System is accessible using a browser anywhere through VPN, enabling secure online water quality -and feeding monitoring.

PC connection enables on-line support from Arvo-Tec service team should the need arise.

BASE CONTROLLER & PC CONNECTION

ARVO-TEC ROBOT CONTROLLER - BASE

The Arvo-Tec BASE control system is a fully integrated feeding, measurement, light control (photo period) and alarm system, with the main purpose of controlling feeding robots.

Each BASE-unit supports up to 3 robots with a total of 240 tanks.

Radio communication between BASE and robot.

The system uses water temperature, oxygen content and biomass as initial data and then controls feeding according to mathematical energy demand model which is adjustable by user. Manual values can be set by the user with ease.

Feeding times can be set manually or by automatic day length calculation. Daily feeding can be divided into two periods by using daily pause option. Daily pause is always set on or off by user and its length is always set by user. Light control will always follow daily feeding period.

Control the day/night cycle of through photo period control. Simulated sunrise & sunset

Robot system with base unit is designed to be operated mainly from PC.

Arvo-Tec BASE-controller is encased in AISI 316 stainless steel cabinet for extreme conditions.

AUTOMATIC FILLING STATION

For the complete Arvo-Tec robot system; the automatic filling station adds further ease and efficiency to daily operations by managing the loading of the feed onto the robots.

System detects when robot is home and loads it automatically stopping when optical sensors tells the system that the hoppers are full, or when robot leaves the filling station.

High durability and a simple auger conveyer design makes Arvo-Tec automatic filling station reliable.

Options for 2, 3 or 4 feed stations.

2 size options as standard for silos.

75mm Ø auger conveyor as standard or for larger feeds 110mm Ø auger conveyor

Recommended pellet sizes:

75mm Ø auger	0,3-6mm Ø
110mm Ø auger	6-10mm Ø

Power: 400 VAC 3-phase as standard. Other voltages on request
